MSc Applied Linguistics

Abstract

The study examines the public and teachers' perceptions of Taiwan's 2030 Bilingual policy, using (1) a corpus-assisted discourse analysis together with a thematic analysis of YouTube comments, and (2) ethnographic interviews with schoolteachers. Framed by neoliberal language ideologies that distort and amplify English's instrumentalism, the results show that, in the face of the imposed bilingual policy, online commenters make frequent reference to the public's stress and compare Taiwan with other East Asian countries regarding the competitive edge English provides as well as strategies to become bilingual. The teachers report disorientation over the policy implementation, highlight practical teaching difficulties, and point to possible passive resistance. English is seen as capital accessible only to the affluent and a mechanism employed by institutions to access educational resources. Both sources of commentary underscore English's marginalizing effects on local languages and content learning. The study calls for recognizing the harms caused by prioritizing English, listening to forefront teachers, critically evaluating the role of globalizing English, and challenging ideological works ungrounded in research and empirical evidence, with a shift from language-as-resource to language-as-struggle orientation to combat social inequalities in neoliberal times.

Keywords: Bilingual 2030, neoliberalism, corpus-assisted discourse study (CADS), Language Ideologies, Globalizing English,

LISTENING		READING	
Your scaled score is between 400 and 495. Test takers who score around 400 typically have the following strengths: • They can infer the central idea, purpose, and basic context of short spoken exchanges across a broad range of vocabulary, even when conversational responses are indirect or not easy to predict. • They can infer the central idea, purpose, and basic context of extended spoken texts across a broad range of vocabulary. They can do this even when the information is not supported by repetition or paraphrase and when it is necessary to connect information across the text. • They can understand details in short spoken exchanges, even when negative constructions are present, when the language is syntactically complex, or when difficult vocabulary is used. • They can understand details in extended spoken texts, even when it is necessary to connect information across the text and when this information is not supported by repetition. They can understand details when the information is paraphrased or when negative constructions are present. To see weaknesses typical of test takers who score around 400, see the "Proficiency Description Table."		Your scaled score is close to 450. Test takers who score around 450 typically have the following strengths: • They can infer the central idea and purpose of a written text, and they can make inferences about details. • They can read for meaning. They can understand factual information, even when it is paraphrased. • They can connect information across an entire text, and they can make connections between two related texts. • They can understand a broad range of vocabulary, unusual meanings of common words, and idiomatic usage. They can also make distinctions between the meanings of closely related words. • They can understand rule-based grammatical structures. They can also understand difficult, complex, and uncommon grammatical constructions. To see weaknesses typical of test takers who score around 450, see the "Proficiency Description Table."
